

# DMX BOOSTER

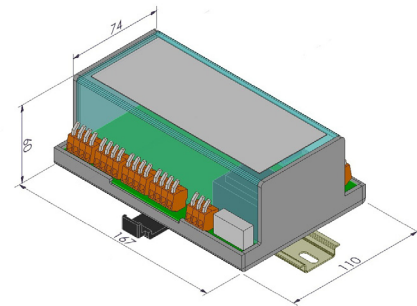

## SPECIFICATIONS

- 1 input and 1 passive link through
- 4 optically isolated outputs
- all DMX connections on UTP
- din-rail mountable
- power connections on wago cage clamp®
- manufactured in the EU under ISO 9001 quality control

## DIMENSIONS

DMX is playing a major role in the world of lighting controls. It is a flexible way of transmitting data to different dynamic luminaries. The dmx booster is developed to distribute, isolate and amplify the DMX data. By using this card, system reliability is greatly enhanced and system topology is becoming more structured.
