

FLEX PIXEL PANEL

SPECIFICATIONS

- dimension: 100 x 200 mm
- 200 RGB pixels / panel
- pixel distance: 10mm
- LEDs separately controllable
- flexible panel in two direction
- multiple panels can be connected together
- power: 4 W/ panel
- input voltage: 5 VDC & 12 VDC
- every 4 pixels can be cut from the panel
- video data input from dedicated controller
- CE compliant
- manufactured in the EU under ISO 9001 quality control

The Flex Pixel panel is a versatile flexible led pcb to create tailor-made video panels. Due to the flexibility and the cutting of the panels, the creative possibilities are endless. With a dedicated video controller provided by Lux Lumen, multiple panels can be driven with the right video content for the project.
